Students in the program will acquire the ability to design economically viable biological or thermochemical processes for the conversion of biomass and waste into new materials or energy carriers, within a sustainable development frame. Consequently, BiWEM focus on chemical engineering but also includes courses on economics, international regulations and on certain areas of the social sciences and humanities.

PROGRAM
This is a full-time program of 2 years divided into four semesters: lectures, tutorials and practical work over the 3 academic semesters followed by an internship of one semester in a company or in a public research lab. The program is composed of five teaching blocks, including an integrated team project over the three academic semesters under the supervision of expert practitioners.

During the 6-month MSc thesis, students have the opportunity to consolidate and improve the knowledge and the skills being taught. Students are supervised by a tutor from the host organization and by a senior lecturer from Mines Albi. Thesis is concluded by the preparation of a final report and an oral dissertation in front of a jury.

1. Environmental and social economic issues (26 ECTS)
   - Ethics, management and economics of the environment
   - Corporate social responsibility
   - Ecotechnologies and innovation
   - Global environmental business

2. Fundamental science and generic engineering tools (20 ECTS)
   - Fundamentals of transport phenomena, applied chemistry, biochemistry, metabolic pathways
   - Generic numerical and experimental methods for process optimization and engineering
   - Process modeling, integration and assessment

3. Fundamentals for renewable resource conversion (22 ECTS)
   - Resource availability, collection and sustainability
   - Biomass and waste pre-processing
   - Fundamentals of biological and thermochemical reactor design

4. Putting theoretical concepts into practice (22 ECTS)
   - Gas and solid coproducts post-processing
   - Industrial visits
   - Industrially-relevant project work, sponsored by industrial partners: Environmental-friendly design of an economically viable processing route for turning waste or biomass into energy, chemical or useful material.

5. MSc Thesis (30 ECTS)
   - 6-month Msc thesis in industry or in a public research lab, in France or abroad.

LOCATION
The 3 academic semesters will be held on the Mines Albi campus. Albi is located 70 km from Toulouse, the capital city of the French southwestern Midi Pyrénées Region, which is ranked among the 12 most dynamic European Regions. The city of Albi is part of the UNESCO’s World Heritage.

ADMISSIONS REQUIREMENTS
Participants must hold a four-year Bachelor of Science or Engineering degree, in the field of chemical engineering, clean technology, mechanical engineering, energy. Participants with some industrial experience are also welcome.

LANGUAGE REQUIREMENTS
English
- Mother tongue
- or Bachelor degree taught in English
- or English language qualification such as TOEFL IBT 80, IELTS 6.0, TOEIC 750, Cambridge CAE.

French
No prerequisite in French, but TEF II or equivalent may be required to obtain a visa.

APPLYING
All applications should be made on-line: www.mines-albi.fr/biwem
Applications are open from January to June each year.
Biomass and Waste for Energy and Materials

**HIGHLIGHTS**
- Program boosted by the research department RAPSODEE CNRS UMR 5302 having an outstanding international recognition. This centre has been granted by the French government as a research centre of excellence in Science for Energy Conversion (under Labex and Equipex funding schemes). This label is given to only 10% of the research labs in France. RAPSODEE has also developed and hosts the Springer peer-reviewed journal “Waste and Biomass Valorization” and the WasteEng Conferences Series.
- Strong interaction with industry through conferences, practices and visits. RAPSODEE works closely with more than 50 companies, including world leaders in the field of Energy and Environment.
- Good grounding in a core set of engineering competencies.
- In-depth knowledge of the key cross-cutting methods associated with process design and integration.
- Access to impressive and up-to-date on-site pilot-scale facilities.
- Opportunity to undertake an industrially-relevant project, sponsored by companies, and to develop a sense of decision-making.
- 6-month MSc thesis in industry or in a public research lab.
- A quality charter to welcome international students to the Mines Albi international campus.
- Masters taught entirely in English and in small groups.
- Free French language courses.

**SKILLS ACQUIRED**
- Ability to use state of the art, sciences, technology, business model and regulatory aspects to conceive and develop processing routes for waste and biomass valorization.
- Ability to use experimental and numerical methods for process conceptual and detailed design, optimisation and assessment.
- Ability to think green, preferably with a circular economy mind-set.
- Ability to understand, analyse and manage complex systems.
- Ability to recommend strategies to meet business and ecological goals.
- Ability to undertake socially responsible innovative industrial projects.
- Ability to work well with others, across culture and disciplines.
- Ability to present convincingly and argue a case in front of an audience, write reports, publications and short communications.

**TYPICAL JOBS**
- R&D Engineer
- Junior Project Engineer
- Process Engineer
- Design Engineer
- Exploitation engineer
- Environmental consultant

**COST**
€ 18,000 for the complete MSc. program (4 semesters, 120 ECTS)

**SCHOLARSHIPS**
Scholarships are available depending on academic results and countries of origin (companies, governments, embassies...). Internships are paid and cover living expenses during the last semester.

**ADDRESS**
Mines Albi
Campus Jarlard - Route de Teillet
81013 Albi CT Cedex 09 – France

**CONTACT**
Website

Email
⇒ biwm-admission@mines-abi.fr
Phone
⇒ +33 5 63 49 33 49

**CALENDAR**
One intake per year (mid-September).
- Year 1: Two academic semesters at Mines Albi.
- Year 2: One academic semester at Mines Albi + a 6-month MSc thesis, in France or abroad.

**LODGING**
Individual furnished studio apartments are available for international students during their stay. The residences are on the school campus or in downtown Albi and offer comfort and facilities to the students. Living expenses are quite low in Albi compared to other locations in France. Accommodation at the students’ Residence costs about € 330 per month. The total living expenses should not exceed € 6,000 per year (on campus food and accommodation).
