Start-up book 2024

Les Grandes Écoles des grands défis ▼

Institut Mines-Télécom's start-up book 2024 highlights the resilience and impact of project leaders and creators.

Our start-up, whether they are deeptech or not, are adapting. They are seizing opportunities. They are acting as catalysts of transformation for an innovation that is conceived from the outset as responsible.

They contribute to accelerating reindustrialization and sovereignty. They respond to the environmental emergency with solutions and services for carbon neutrality. They develop a frugal digital approach in the material, immaterial and informational production of companies. Generally speaking, they contribute to increasing competitiveness in key sectors such as digital, energy, society, health, sustainable city, and education.

The start-up are backed by the training, research and economic development expertise of the eight leading French technological universities Institut Mines-Télécom. They rely on the cutting-edge scientific and technical research, the large scale platforms and the expertise in human and social sciences that are developed there. They take advantage of the network of professionals from the socio-economic world who are partners of Institut Mines-Télécom.

In addition to personalized coaching programs for scale-up and a system of loans from the early stage, the start-up benefit from the dynamics of the leading network of public incubators in France, with more than 80 new projects supported per year, a 5-year survival rate of more than 80%, €100M raised and 5,000 jobs created.

These are the conditions to live and succeed in a wonderful human adventure!

Summary

01.

Key differentiators and key figures

p. 06-08

02.

04.

Alphabetical index

p. 62-63

01.

Key differentiators

The schools' incubators provide entrepreneurs with privileged access to each school's labs and R&D platforms. They provide a solution for project leaders that goes far beyond the framework of traditional incubation. As a result, IMT's start-ups are characterized by a strong technological core and an outstanding 5-year survival rate of more than 80%.

Responsible industry of the future

**AGNOSTIC
PRODUCTION
SYSTEMS SAS**www.aps-industry.com

Industry 4.0

Founded in 2023, Agnostic Production Systems (APS) leads the way in manufacturing innovation with its groundbreaking «Click and Produce» solution. APS meets the critical needs for competitiveness, flexibility, and sustainability amid current ecological and energy challenges, aiming to reclaim industrial sovereignty. Our technology transforms factories into smart, adaptable facilities, redefining how production systems are designed, operated, and continuously adapted. By applying Industry 4.0 principles, «Click and Produce» enables seamless integration of equipment and métier applications, enhancing operational efficiency while controlling environmental impact. This pioneering solution fosters continuous innovation and underscores our commitment to social and environmental responsibility.

IMT Mines Alès

**Anax**

AR/VR

ANAX has developed is a software solution for real estate players to simplify and improve virtual tours. The solution is based on artificial intelligence technology that reconstructs the environment from panoramic photos.

IMT Atlantique

**Bansira**www.bansira.com

AI & Data

Bansira is driving innovation in the banking and finance industry, providing cutting-edge technology and expert solutions.

Mines Saint-Étienne

BEHAVwww.beha-v.com

Sustainability

BEHAV is an industrial start-up producing innovative fabrics with low environmental impact and significant social impact. We are currently working on a plant-based alternative to animal leather, made with cactus leaves and aloe vera non-valued wastes. Our vision is to contribute to the ecological transition of the fashion industry by addressing two critical issues: reducing environmental pollution resulting from the production of animal and synthetic leather and meeting the European Union's circular economy targets, particularly the AGEC law.

IMT Nord Europe

**Brightclue**<https://www.brightclue.com/>

AI & Data

BrightClue builds and develops 3D recognition solutions for industries. BrightClue is pioneering the processing of 3D and related technical data. We aim to become the leader in leveraging 3D databases.

IMT Atlantique

**BubbleRAN**<https://bubbleran.com/>

Industry 4.0

We are helping organizations to seamlessly build, operate, and automate their private 4G/5G network and services, in a form of connectivity-as-a-service, by consolidating Open RAN and Cloud-Native compliant architectures with a green service management and orchestrator (SMO) offering more than 100x efficiency and business agility and flexibility (e.g. delivery cycle and upgrade) with lower carbon footprint for a wide range of R&D and enterprise use-cases.

Eurecom

Coffee encapsulation machine.

IMT Atlantique

**CERANEQ**<https://www.ceraneo.com>

BtoB

You must already have shared a meal over a good bottle of wine but do you know that for one liter, manufacturers use two liters of water, just to bottle it ? Our filter CERANEQ is going to help the wine industry reduce its impact on the environment. Nowadays, here is how most of the users talk about filters on the market : « They work well but we are led to use such a large quantity of water, as well as chemicals to clean them ! ». The solution by CERANEQ : a filter with a totally innovative design, which can be cleaned no longer with water and chemicals but which temporarily uses the liquid filtered. Imagine a world in which we could save water, lower the cost of our bills and, above all, build a brand image with regard to our global eco-responsible approach.

IMT Mines Alès

CleverValues

<https://www.clevervalues.com/>

Enterprise Solutions

CleverValues allows you to naturally use the best practices in «value based marketing», thanks to a platform that will allow your teams to better build and position your offers by working on the value they really bring to your customers.

The Regulated Carbon Project

regulatedcarbonproject.com

Sustainability

The Regulated Carbon Project is on a mission to offer an impactful alternative to the offsets on the voluntary market, by opening the regulated carbon market to all. Our mission is to make the regulated carbon market efficient, transparent and inclusive. Our EO2 tokens are a safe and sustainable alternative Digital Asset suitable to meet the financial needs for diversification and investment of individuals and an effective resource to achieve the sustainability goals of businesses while fighting Climate Change

Eurecom

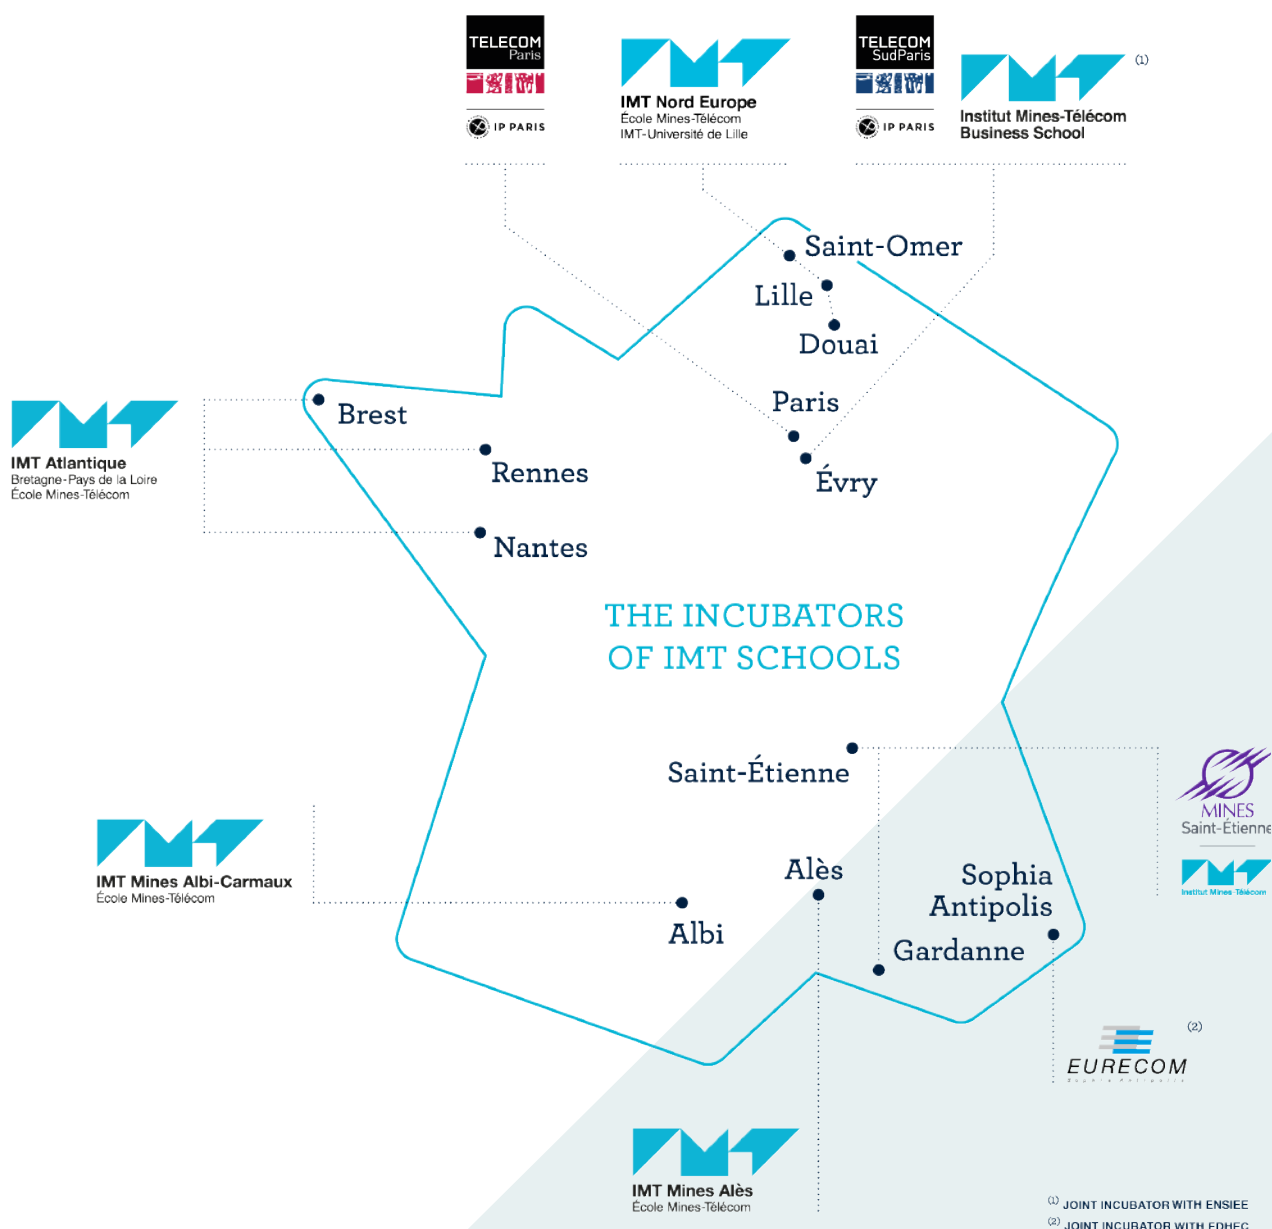

03.

A national network of incubators

Strongly embedded in their region, the incubators of the IMT schools contribute to regional economic development, with more than 80 companies created each year. Together, they form a vast network, benefitting from the dynamism of IMT's national activities, and have access to a range of complementary programs to those implemented in their region: the IMT-Bercy Innovation Award, participation in international fairs (VivaTech, Bits & Pretzels, ...), Learning Expeditions, honor loans from the Fondation Mines-Télécom, Technology Demo Days, etc...
