IMT

IMT is a French Federal Institute of Technological Universities of science and management for sustainable economic development.

Created to meet France's economic and industrial development needs since the nineteenth century, IMT's Technological Universities have supported every industrial and communications revolution. Through research and the training of engineers, managers and PhDs, IMT is addressing the major industrial, digital, energy and ecological challenges facing France, Europe and the entire world.

Today, we are designing and building – together – a world that reconciles science, technology and economic development with respect for the planet and its inhabitants.
