

DIGITAL & SUSTAINABLE FINANCE

Digital and Sustainable Finance

Traditional track, taught in English

Objectives

You benefit from a dual-skill education in financial market and information systems, now broadened to encompass digital innovation and sustainable finance practices. **You will be especially exposed to the integration of emerging technologies and ESG considerations into financial processes.** This curriculum equips you with the ability to:

- > Master financial markets, the derivatives traded and the risk management
- > Understand the end-to-end flow and processing of financial and non-financial data
- > Position the role and impact of information systems and digital technologies (data analytics, AI) within both market finance and sustainable finance contexts
- > Communicate fluently with technical teams, business stakeholders and project owners to drive digital transformation in finance

Career opportunities: Functional Consultant, Business Owner & Business, Analyst (MOA/AMOA), Financial Applications Specialist, Investment Banking Project Manager, Support Operations & Trading Assistant, Private Equity Analyst, Software Design & Development Engineer, IT Quantitative Analyst, Risk Analyst, Asset Manager
